Dear Community,
Our work took us from London to Bermuda to Indonesia this July. A major milestone came on July 13, when the launch of the Indonesia Open Network (ION) was formally listed in the official bilateral statement between India and Indonesia alongside several key strategic milestones. Built on NFH, ION will digitize Indonesia's massive MSME sector, starting with retail and logistics, expanding next into financial services and tourism.

Here are the other updates from the month.

Latest developments

Finternet reaches regulators, researchers and climate leaders

During London Climate Action Week, the E-ledgers Institute presented how digital infrastructure can support carbon accounting on the Finternet, alongside companion work from Harvard Business School and Oxford. In Bermuda, we contributed to the evolving regulatory framework on asset tokenization by submitting a response to the Bermuda Monetary Authority, sharing our perspective on the future of interoperable digital finance.

Everyone is regulating stablecoins, but why are they not asking the same questions?

Global regulation is reshaping stablecoins into regulated financial infrastructure. At NFH, we read these evolving frameworks as engineering inputs.
